SUMMARY

Product Designer with 15+ years of experience delivering scalable UX solutions and enterprise-grade frontend applications. Specialized in design systems, workflow automation platforms, and AI-assisted development. Proven ability to improve usability, accelerate development cycles, and bridge design with engineering using Angular, React, and modern AI tools.

KEY ACHIEVEMENTS

- Built an AI-driven claims validation platform automating rule derivation and claim adjudication
- Reduced design-to-development cycle time by ~40% using AI-assisted workflows
- Built scalable design systems adopted across multiple enterprise applications
- Improved workflow efficiency and usability in automation platforms
- Delivered multiple enterprise UX solutions impacting large-scale users

SKILLS

UX Design: User Research, Wireframing, Prototyping, Interaction Design, Design Systems

Frontend: HTML5, CSS3, SCSS, TailwindCSS, JavaScript, TypeScript, Angular, React

AI & Backend: Python, FastAPI, LLM Pipelines, Prompt Engineering, Elasticsearch, OpenAI API

Tools: Figma, Adobe XD, GitHub Copilot, Claude, Gemini, AI-Assisted Development

Accessibility: WCAG, Responsive Design

EXPERIENCE

UST — Specialist I, UX Design (Dec 2016 – Present)

Product: Healthcare Claims Validation Platform

Role – Specialist I – UX Design / Full-Stack Development (May 2026 – Present)

- Built an AI claims validation platform to automate healthcare benefit adjudication.
- Architected a hybrid validation combining a two-stage LLM pipeline with a Python rule engine.
- Created rule lifecycle management and human-in-the-loop workflows for expert review.
- Built semantic retrieval mapping benefits to claim codes via Elasticsearch hybrid search.

- Developed the full-stack application from scratch using FastAPI and React/TypeScript.
- Stack: FastAPI, React/TypeScript, Elasticsearch, Vector Embeddings, Python, OpenAI. Claude Code, Github Copilot

Product: Intelligent Automation Platform (Automation Workflow Builder, AI Marketplace, Dashboard Builder)

Role – Specialist I – UX Design (Sep 2021 – Present)

- Designed and developed workflow builder, AI marketplace, and dashboard systems
- Improved UI consistency by ~40% through centralized design system
- Accelerated prototyping using AI tools, reducing effort by ~30%
- Built Theme Builder for PrimeNG using Angular, Github Copilot and VS Code
- Collaborated with engineering teams for scalable frontend implementation

Product: Xtract Web

Role – UI Designer/Developer (Sep 2020 – Aug 2021)

- Designed and developed enterprise web interfaces
- Improved performance and usability of internal tools
- Built responsive UI using HTML, SCSS, JavaScript, Blazor

Internal Product: CrystalBall

Role – UI Designer / Developer (Apr 2020 – Aug 2020)

- Designed UI systems, mockups, and prototypes
- Contributed to Angular-based frontend development

Product: Ticket Booking

Role – UI Designer / Developer (Dec 2016 – Mar 2020)

- Started as UI Designer and transitioned to frontend developer
- Improved accessibility (WCAG compliance)
- Built Angular-based frontend features

Vtrio Solutions Pvt Ltd — UI Designer / Developer (2005 – 2016)

- Designed web and mobile interfaces
- Developed UI themes and frontend components
- Worked with WordPress, Magento, Shopify, PHP, jQuery

CERTIFICATIONS

- **Claude Certified Developer** (Anthropic) 2026
- **Google UX Design** (Google) 2023
- **Claude Code in Action** (Anthropic) 2026
- **Enterprise Design Thinking Practitioner** (IBM) 2023
- **Creative Coding** (Domestika) 2023

EDUCATION

Bachelor of Commerce (BCom)

MA College, Kothamangalam, 2003-2005
